EXAMINER

ALVAREZ, RAQUEL

ART UNIT

PAPER NUMBER

3682

NOTIFICATION DATE

DELIVERY MODE

07/13/2011

ELECTRONIC

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

PATDOCTC@fr.com

Office Action Summary	Application No. 10/647,116	Applicant(s) DONOVAN ET AL.	
	Examiner RAQUEL ALVAREZ	Art Unit 3682	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 October 2010.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☐ Claim(s) 1-10, 12-21, 31-69 and 71-73 is/are pending in the application.
- 4a) Of the above claim(s) 19-21 and 31-65 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-10, 12-18, 66-69 and 71-73 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. This office action is in response to communication filed on 10/18/2010.
2. Claims 1-10, 12-21, 31-69 and 71-73 are pending on this application. Claims 19-21 and 31-65 are withdrawn. Claims 1-10, 12-18, 66-69 and 71-73 are presented for examination.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-10, 12-18, 66-69 and 71-73 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kay (WO 00/38074 hereinafter) in view of Subramanian al. (2002/0123912 hereinafter Subramanian).

With respect to claims 1, 9, 68, Kay teaches a computerized system for generating an advertisement grouping comprising a first plurality of advertisements based on advertisement rankings associated with the first plurality of advertisements (i.e. determining view-ups based on bids)(Figure 1);

storing the advertisement in association with a network-based locator as being an up-to-date advertisement grouping for a specific distribution subject (see 16A);

generating a modified advertisement comprising a second plurality of advertisements if the advertisement rankings change as compared to the advertisement

rankings on which the generation of the advertisement was based (i.e. as new view-up advertisement become available, the system compares the new view-up to other bids in order to select the highest bids)(see Figure 3A and page 16, lines 2-5);

storing the modified advertisement in association with the network-based locator as being the up-to-date advertisement for the specific distribution subject; receiving a request for an advertisement associated with the network-based locator; and in response to receiving the request, transmitting the up-to-date advertisement grouping stored in association with the network-based locator (see Figure 3B).

With respect access indication means for receiving a request for the advertisement image associated with the network-based locator for inclusion in an electronic document and advertisement image generation including ranking means for generating advertisements ranking/ re-ranking and storing the highest ranked advertisements and the modified advertisements image (i.e. Kay teaches inserting the new ads images for inclusion on the website, based on the ranking and storing the advertisement image in order for later display)(see Figures 3A, 3B and page 16, lines 2-5).

Subramanian teaches access indication means for receiving indication of a user accessing an electronic document, wherein the electronic document includes the network-based locator (Subramanian teaches on paragraph [0113] "In use the contextual advertisement and the contextual affiliate link software and hardware provides an infrastructure that provides contextual presentation of the advertisements and links. As an example, if Hewlett-Packard ("HP") is the Service Provider 16 which is

Art Unit: 3682

using contextual advertisement, HP will define the rules for when its advertisement should be shown. If HP defines a rule that targets the selling of HP printers with Compaq computers, then when a user looks at a page with Compaq computers, the appropriate HP advertisement 128 will be shown as illustrated in FIG. 12. In another example, assume that Barnes and Noble is the Service Provider who has an affiliate program and CNET signs up to be Barnes and Noble's affiliate site. Then Barnes and Noble can define a rule that an affiliate link for books on "PC Computers" should be shown when a user is looking at Dell computers. As a result, when a user looks for Dell computers at CNET, IF the appropriate advertisement and affiliate link 130 for Barnes and Noble is shown as illustrated in FIG. 13"). It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included in the system of Kay the teachings of Subramanian of access indication means for receiving indication of a user accessing an electronic document, wherein the electronic document includes the network-based locator in order **"to allow users to focus on what they want, allow service providers to focus on what they offer, and alleviate the effort currently required on both sides to find each other"** ((Subramanian, paragraph 0003).

With respect to claims 2, 4, 6-8, Kay further teaches a bid representing an amount to be paid for click-throughs by end-user recipients to target site associated with the advertisement (i.e. advertisers entering a "bid" which is the amount of money that

Art Unit: 3682

the advertisers pay when a user clicks on their listing)(page 12, lines 18-24 and page 14, lines 5-7).

With respect to claims 3, 5 Kay further teaches grouping advertisements based on the highest revenue efficiency (page 14, lines 9-20).

Claims 10-18, 71-73 further recite providing an electronic document including a link to the network based locator without providing the advertisement image.

Subramanian teaches providing affiliate link 130 and the user having to click on the link in order to open the advertisement image. It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included recite providing an electronic document including a link to the network based locator without providing the advertisement image because such a modification would redirect the surfer to another web page without revealing the content of the link.

With respect to claims 66-67, Kay further teaches the advertisements are identified in corresponding portions of the graphical image by an HTML image map (see page 7, lines 22-24).

Claim 69 further recites that the electronic document is an email. Official Notice is taken that it old and well known for electronic documents to be in the form of e-mail in

order to allow recipients to view the electronic information when they please. It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included the electronic document being email in order to obtain the above mentioned advantage.

Response to Arguments

5. The 112 second rejection has been withdrawn.

6. **Applicant argument:** Kay describes a system that evaluates ad rankings when an opportunity to display an ad on a web page becomes available. See page 7, lines 22-25, and page 8, lines 1-10. These viewing opportunities are called "view ops," which are not themselves advertisements. See page 7, line 22. In other words, Kay determines ad rankings one time when deciding which ads to display, namely "when a view-op becomes available." See page 16, line 3. The cited portions of Kay do not describe, however, "evaluating current advertisement rankings of the first plurality of advertisements for changes" and "if there are changes in the advertisement rankings, initiating the advertisement image identification means to identify a modified advertisement image." In contrast, the cited portions of Kay do not teach or suggest comparing previously calculated rankings. Kay simply recalculates rankings when a page viewing opportunity ("view op") presents itself. Kay describes comparing current bids when a viewing opportunity presents itself, but Kay does not describe evaluating rankings for changes in the advertisement rankings in order to identify a modified advertisement image. Therefore, Applicant respectfully submits that the cited

portions of Kay do not describe these features of amended claim 1. Neither does Subramanian.

7. **Examiner response:** The Examiner respectfully disagrees with Applicant and wants to point out to *In re Bozek*, 163 USPQ 545 (CCPA 1969) Reference disclosure must be evaluated for **all that it fairly suggests** and not only for what is indicated as preferred. Applicant is concentrating in one embodiment of the reference and overlooking other teachings and embodiments. Kay teaches on page 8, lines 5-9 “*It compares various bids from bidding agents 30 in order to determine which advertisement to display.....It sends the appropriate advertisement from data base 16A to browser 11*”. Also Figure 1 teaches constant ads bidding agent bidding on the ads in order for the system to determine which ads image to present. And in addition page 10, lines 9-21 evaluating advertisements *proposed bids in microseconds, that is, in real time* to determine the ads image to display and advertisers being able to change their bids in *microseconds*. Changes in the advertiser’s bids will result in changes/modification of the advertisements image to be displayed. As can be seen by the recitation of Kay above, changes to the bidding and ranking of the ads are determined in order to determine which advertisements image to display based on the advertisements biddings/rankings.

Point of contact

Any inquiry concerning this communication or earlier communications from the examiner should be directed to RAQUEL ALVAREZ whose telephone number is (571)272-6715. The examiner can normally be reached on 9:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Namrata (Pinky) Boveja can be reached on (571)272-8105. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
